NAME	COUNTRY
EASTMAN KODAK CO	

APPL-NO: JP2002236976
APPL-DATE: August 15, 2002

PRIORITY-DATA: 2001US-930696 (August 15, 2001)

INT-CL (IPC): H04N 1/387; G06F 3/12; G06T 1/00; G09C 1/00; G09C 5/00

ABSTRACT:

PROBLEM TO BE SOLVED: To prepare an authenticable original document on a medium having a physical indicia identifier and a printed identification number.

SOLUTION: A digital file is generated by obtaining the high-resolution scan of the physical indicia identifier, a high-resolution scan file is related to the identification number printed on the sheet of the medium, the high-resolution scan file is stored, a digital text file to be printed on the sheet is created and produced and by using this file, a message image is created. Then, the message image is combined with the high-resolution scan file of the identifier to create a distributed message, and the distributed message is printed on the sheet together with the text file.
